JSON file discrepancies for Hospital referral for assessment for community care and support V1.1

This note details some discrepancies in the JSON file for the Hospital referral for assessment for community care and support information standard.

Referral details section

Referrer details

The full path is:

Referral details>> Referral details record entry>> Referrer details

The description is missing a small part shown in blue and should be:

The details of the referrer **that is making the transfer**. This could be the person, GP surgery, department, specialty, sub-specialty, educational institution, mental health team, care home etc.

Social Context section

Social circumstances

The full path is:

Social Context>> Social circumstances>> Social circumstances

The description is missing the hyperlink for “Carer” which is:

https://datadictionary.nhs.uk/nhs_business_definitions/carers.html
